Response to Amendment

1. This Office Action is responsive to amendment received on 4/4/2007 and subsequent telephonic interview with the Applicant (5/16/2007).

Applicant amended claims 25-28 and 36-40.

Allowable Subject Matter

2. Claims 2, 3, 10-40 are allowed over prior art of record.

The following is a statement of reasons for the indication of allowable subject matter:

The closest prior art of record, Wallace et al. (US 6,473,467) and Murakami (US 6,317,409) are in the same field of endeavor using either one large size of Fast Fourier Transform (FFTs) or plurality of same type FFTs. However, the cited art, alone or taken in combination, fails to disclose the unique steps of "performing Inverse Fast Fourier Transform (IFFT) upon the sub-band signals using a respective one of a **plurality of different IFFTs for each sub-band signal** in transmitter (claims 17, 20, 30, 31) and, a respective one of a **plurality of different FFTs corresponding to the IFFTs** on receiver side (claims 25 and 36). Different IFFTs (and (FFTs) are used to reduce computation time and chip size using only a part of the frequency band for transmission.
